SAMUEL CHRISTY ANGIE SIHOTANG

Jakarta, Indonesia | +62 895-6123-60693 | samz.my.id | samsihotang1@gmail.com | linkedin.com/in/samuelsihotang1

Full-stack Software Engineer delivering retail ERP, POS, and loyalty platforms with Laravel, Angular, Ionic Angular, React, and .NET. Specializes in cross-system integration, multi-tenant architecture, and database performance tuning, cutting redundant API calls by 40% and developer debugging time by 70%.

PROFESSIONAL EXPERIENCE

Alturian Indonesia – Full Time Oct 2025 – Present

Software Engineer

- **Feature Engineering & Cross-System Integration:** Tasked with launching a referral programme that had to stay consistent across a fragmented retail stack, designed and integrated an affiliate promotion system across 3 core platforms (Loyalty App, POS/Cashier, and Admin Panel), enabling real-time voucher redemptions, driving a 25% boost in organic user acquisition, and providing 100% data transparency for referral tracking.
- **Architecture Refactoring & Developer Experience Optimization:** Inherited a legacy Android-bound Ionic Angular codebase that slowed every debugging cycle; refactored it into a Progressive Web App (PWA) using an environment-based database strategy (SQLite WASM & SQLite Cordova), accelerating developer debugging time by 70% while preserving existing business logic and core system functionality seamlessly.
- **Client & Database Performance Tuning:** Assigned to cut server load on data-heavy ERP and POS screens, optimized system performance by implementing infinite scrolling, search debouncing, and relational database table normalization, cutting redundant API calls by 40% and significantly reducing server workload.
- **Multi-Tenant Architecture & Data Isolation:** With a single shared codebase serving multiple enterprise retail clients, designed a reusable entity-scoping layer with role-based access control and rolled it out across 4 module families (promotion, customer, merchandising, and loyalty), enforcing per-tenant data isolation centrally and eliminating repetitive manual checks from every query.
- **Platform Scalability:** Responsible for keeping reporting responsive as transaction volume grew, implemented monthly table sharding across high-volume sales-detail and receipt tables with targeted indexes, cached count queries, and batched synchronisation jobs.
- **Production Incident Response & Data Reconciliation:** When a promotion-pricing defect in the live POS made receipt totals diverge from the amount due for 8 customers, traced the root cause, shipped a hotfix within an hour, and wrote a reconciliation script that corrected 40 affected rows against the related POS transaction logs, then added validation and idempotency checks to prevent recurrence.

PT Tera Multi Wahana – Remote Aug 2024 – Jun 2025

IT Developer Intern

- Developed a C# REST API on .NET Framework serving Flutter web, Android, and XAML desktop clients, with authentication, validation, and error handling, achieving sub-50 ms response times through endpoint optimization.
- Built a Dart and Flutter web application for data processing and reporting, plus a XAML desktop application for data management.

PT Infosys Solusi Terpadu – Remote Jun 2024 – Aug 2024

Backend Developer Intern

- Engineered Java middleware on the Software AG platform and implemented a data validation layer that hardened the security and integrity of a financial program.

PERSONAL PROJECTS

SiniAja! – Link-in-Bio Platform for Creators & Small Businesses siniaja.samz.my.id

Go · Gin · GORM · React 19 · TypeScript · Vite · Tailwind CSS · MySQL

- Built an API-only Go (Gin) backend and a React + TypeScript SPA, with a config-driven registry for every content block type.
- Secured accounts with MFA, trusted devices and rate limits, backed by 60+ Go tests that reject unauthorized requests.
- Repaints each page from its last known state while fresh data loads, serving repeat profile visits over 10x faster.

Snapshore – Phone-to-Laptop Photo Transfer over Cable or Wi-Fi snapshore.samz.my.id

Go · Wails · React · TypeScript · Kotlin · Jetpack Compose · Swift · SwiftUI · TLS · mDNS

- Designed an HTTPS protocol where the phone serves and the laptop fetches, with mDNS/USB discovery and pinned-TLS pairing.
- Shipped Go + Wails Windows/macOS apps with an offline photo timeline and map, plus Kotlin/Compose Android and SwiftUI iOS.
- Deletes only files SHA-256 verified on disk, pinned by 280+ tests; moved 12,000 photos off a 4 GB phone at an 81.5 MB peak.

Habit Shaper – Habit Tracker for Building Good Habits & Breaking Bad Ones habit.samz.my.id

React 19 · TypeScript · Vite · Tailwind CSS · Node.js · Fastify · MySQL · Redis · Docker

- Built a Fastify + TypeScript API and a React SPA that derive streaks from a per-day log in each user's time zone.
- Hardened sign-in with argon2id, hand-written TOTP and Redis rate limits; 130+ tests, shipped as one Docker Compose stack.

SKILLS

Technical Skills: PHP, TypeScript, JavaScript, C#, Java, Dart, Go, Kotlin, Swift, SQL, Laravel, Angular, Ionic Angular, React, Fastify, Gin, .NET, Flutter, Tailwind CSS, MySQL, SQLite, Redis, REST API, Query Optimization, Table Sharding, Docker, Git, PWA, Automated Testing

Soft Skills: Problem Solving, Detail and Accuracy, Communication and Presentation, Collaboration and Teamwork

EDUCATION

Institut Teknologi Del – Toba Sep 2021 – Sep 2025

Bachelor's Degree in Information Systems, GPA 3.65/4.00

CERTIFICATIONS & LEADERSHIP

HackerRank: Software Engineer · Problem Solving (Basic) · Java (Basic) · CSS (Basic)

Leadership: Chairman, Association Consultative Assembly · Vice Chairman, Del Programming Club (Sep 2023 – Apr 2024)
