SAMUEL CHRISTY ANGIE SIHOTANG

Jakarta, Indonesia | +62 895-6123-60693 | samz.my.id | samsihotang1@gmail.com | linkedin.com/in/samuelsihotang1

Full-stack Software Engineer experienced in end-to-end web and mobile application development, from the UI to RESTful APIs and databases, with TypeScript, Laravel, Angular, Ionic Angular, React, Node.js, and Flutter. Shipped scalable retail ERP, POS, and loyalty platforms for 5 enterprise clients, growing organic user acquisition by 25% and cutting redundant API calls by 40%.

PROFESSIONAL EXPERIENCE

Alturian Indonesia – Full Time Oct 2025 – Oct 2026

Software Engineer

Developed and maintained features across 20+ web and mobile apps (ERP, POS, loyalty, e-invoicing) for 5 enterprise retail clients, end to end from database schema and Laravel REST APIs to Angular and Ionic Angular (TypeScript) UIs.

- **Cross-System Integration:** Built an affiliate referral system across the Loyalty App, POS, and Admin Panel with real-time voucher redemption, growing organic user acquisition by 25%.
- **APIs & Reliability:** Integrated a third-party WhatsApp OTP API into the loyalty app and backend for sign-up and password reset, and hardened live POS checkout and payment flows with Sentry error tracking and race-condition fixes.
- **Performance & Scale:** Cut redundant API calls by 40% on ERP and POS screens with infinite scrolling, debounced search, and table normalization, and kept reporting responsive with monthly table sharding, targeted indexes, and cached counts.
- **Multi-Tenant Security:** Designed a reusable scoping layer with role-based access control (RBAC) for promotion, customer, merchandising, and loyalty modules, enforcing per-tenant data isolation centrally.
- **Production Troubleshooting:** Traced a live POS promotion-pricing defect to its root cause, shipped a hotfix within an hour, reconciled 40 affected rows against transaction logs, and added validation and idempotency checks.

PT Tera Multi Wahana – Remote Aug 2024 – Jun 2025

IT Developer Intern

- Built a Flutter and Dart web app for data processing and reporting, plus a XAML desktop app for data management.
- Developed the C# (.NET Framework) RESTful API behind them, also serving an Android client, with authentication, validation, error handling, and sub-50 ms response times.

PT Infosys Solusi Terpadu – Remote Jun 2024 – Aug 2024

Backend Developer Intern

- Built Java middleware on the Software AG platform with a data validation layer, hardening security and data integrity for a financial app.

PERSONAL PROJECTS

SiniAja! – Link-in-Bio Platform for Creators & Small Businesses siniaja.samz.my.id

Go · Gin · GORM · React 19 · TypeScript · Vite · Tailwind CSS · MySQL

- Built an API-only Go (Gin) backend and a React + TypeScript SPA, with a config-driven registry for every content block type.
- Secured accounts with MFA, trusted devices and rate limits, backed by 60+ Go tests that reject unauthorized requests.
- Repaints each page from its last known state while fresh data loads, serving repeat profile visits over 10x faster.

Snapshore – Phone-to-Laptop Photo Transfer over Cable or Wi-Fi snapshore.samz.my.id

Go · Wails · React · TypeScript · Kotlin · Jetpack Compose · Swift · SwiftUI · TLS · mDNS

- Designed an HTTPS protocol where the phone serves and the laptop fetches, with mDNS/USB discovery and pinned-TLS pairing.
- Shipped native Android (Kotlin/Compose) and iOS (SwiftUI) apps, plus Go + Wails Windows/macOS apps with an offline timeline and map.
- Deletes only files SHA-256 verified on disk, pinned by 280+ tests; moved 12,000 photos off a 4 GB phone at an 81.5 MB peak.

Habit Shaper – Habit Tracker for Building Good Habits & Breaking Bad Ones habit.samz.my.id

React 19 · TypeScript · Vite · Tailwind CSS · Node.js · Fastify · MySQL · Redis · Docker

- Built a Fastify + TypeScript REST API and a React SPA that derive streaks from a per-day log in each user's time zone.
- Hardened sign-in with argon2id, hand-written TOTP and Redis rate limits; 130+ tests, deployed as one Docker Compose stack.

SKILLS

Programming Languages: TypeScript, JavaScript, PHP, Java, Dart, Kotlin, Swift, Go, C#, SQL

Front-End & Mobile: Angular, Ionic Angular, React, Flutter, Jetpack Compose, SwiftUI, Tailwind CSS, PWA

Back-End & Data: Laravel, Node.js, Fastify, .NET, Gin, RESTful APIs, MySQL, SQLite, Redis, Query Optimization, Table Sharding

Practices & Tools: Agile, CI/CD, Automated Testing, Unit Testing, Debugging & Troubleshooting, RBAC, Docker, Git, Sentry

Soft Skills: Problem-Solving, Communication and Presentation, Collaboration and Teamwork, Detail and Accuracy

Languages: Indonesian (Native), English (Intermediate)

EDUCATION

Institut Teknologi Del – Toba Sep 2021 – Sep 2025

Bachelor's Degree (S1) in Information Systems, GPA 3.65/4.00

CERTIFICATIONS & LEADERSHIP

HackerRank: Software Engineer · Problem Solving (Basic) · Java (Basic) · CSS (Basic)

Leadership: Chairman, Association Consultative Assembly · Vice Chairman, Del Programming Club (Sep 2023 – Apr 2024)
